

# Let's Talk Math

I notice that...

I wonder if...

I predict \_\_\_\_\_  
because...

I know \_\_\_\_\_  
because.

First, I \_\_\_\_\_  
because...

I tried \_\_\_\_\_  
and what  
happened was...

A characteristic  
of this is...

\_\_\_\_\_   
reminds me of  
\_\_\_\_\_ because...

One thing that  
makes \_\_\_\_\_ and  
\_\_\_\_\_ the same/  
different is...

I agree because...

My strategy  
is like yours  
because...

This solution  
makes sense  
because...

I disagree  
because...

The solution  
might not work  
because...

Instead of \_\_\_\_\_,  
could you try...

What makes you  
say that?

How did you  
get...?

Can you explain  
why...?

Another strategy  
could be...

Another way to  
look at it is...

I would like to  
add on too...

A suggestion I  
can offer is...

We will need to  
know...

You did a great  
job at...
